Robo-Soccer

All those fans of MESSI and RONALDO out there, tired of brawling? Time to stop talking and start acting. Paint your faces, boot-up your bots, set them in soccer field and scream VISCA BARCA/ HALA MADRID!!

Team ISTE brings you Robo-Soccer, a 1v1 Soccer match between bots.

Event Description:

Bots created by the participants will compete against each other in the one on one soccer/football match. The bot that scores the most goals in the given time limit wins. Its as simple as that!

General Rules:

- The field/arena will be (L X B) in size.
- The robot found pushing or damaging other bots shall be disqualified.
- In case the robot moves out of the arena the robot will result in foul. A free kick will be given to other bot in case of such fouls.
- Each match will last for 15 minutes and will be knockout event
- Cosco tennis ball will be used.
- Decision of the referee will be final and binding.

So charge up your batteries, upload your code and kick off!!

(The bot will be made in the Roboholics Workshop)
